Mercedes-Benz Classic Online Parts Search

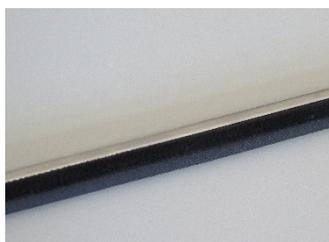

Mercedes-Benz Classic continually produces parts for classic vehicle series, in order to ensure the long-term availability of a full range of such parts. As a result, some 50,000 genuine parts are always available. To render the availability of these genuine parts transparent to everyone, the Classic Online Parts Search has been established as a swift and simple means of presenting the availability of parts with their valid prices in Germany, promotion parts and newly produced parts in a clearly arranged manner. Once the user has found the part they are looking for, it can be ordered from any authorised Mercedes-Benz service partner, as the Group's own sales and logistics network guarantees the swift supply of a comprehensive scope of parts worldwide. Mercedes-Benz Summer of Concerts 2018

Mercedes-Benz Museum pulls crowds from around the world

In 2018, a total of 834,121 visitors came to the Mercedes-Benz Museum. Of those, 109,761 guests attended events like the Summer of Concerts and the Open-Air Cinema. People from all 193 countries of the United Nations have visited the museum since last year. This brought the campaign the museum launched in 2017 to a successful conclusion. It targeted visitors from the seven countries that were still missing from the statistics. India is a newcomer to the top five of the international visitor statistics. The museum also welcomed its nine millionth guest in April 2018.

Photomontage of a Porsche 550 Spyder

Congratulations and free admission for Porsche employees

How strange! What's a Porsche 550 Spyder doing in the Mercedes-Benz Museum's racing corner? This photomontage of the first racing car from Zuffenhausen surrounded by Mercedes Silver Arrows is an anniversary gesture to the Porsche Museum: "Good friends are always welcome." The Mercedes-Benz Museum is combining its congratulations on the occasion of the Porsche Museum's tenth anniversary on 31 January 2019 with an invitation: we are offering Porsche employees free admission to the Mercedes-Benz Museum for ten days until 10 February 2019. Since 2016, the two museums have been collaborating with discounted admission rates. Further information: <http://mb4.me/fnhsvmHi>

Mercedes-Benz “G” model
from model series 460

Big birthday for the off-road classic

Congratulations on 40 years during which time there has been no way but up for the Mercedes-Benz G-Class (combined fuel consumption: 13.1–9.6 l/100 km; combined CO2 emissions: 299–252 g/km*) since 1979: on the one hand, this refers to the outstanding off-road capabilities of the vehicle presented in 1979 and, on the other, the fact that it has remained true to itself and its values for almost 40 years. From the very start, there was also no way but up for the G-model with regard to its status as an automotive icon. For decades, the G continuously evolved from a useful off-road vehicle with high ride quality on the road. Further information: <http://mb4.me/lS1E19uJ>

Mercedes-Benz 220 SE

Passive safety success story

Mercedes-Benz characterises automotive development with continuous safety innovations. Since the middle of the 20th century, the brand has been a systematic innovator and pioneer for this important technological discipline. The success story begins with passive safety – the protection of people against the effects of an accident thanks to vehicle construction and technical systems. Important inventions in this area are celebrating anniversaries in 2019: the safety-enhanced body (1959), the start of systematic crash tests (1959) and the analysis of real accidents (1969) as well as the automatic rollover bar (1989). Mercedes-Benz L 337

Global success with a short nose

Sixty years ago, a defining chapter of the Mercedes-Benz commercial vehicles history began: on 5 March 1959, the Stuttgart brand presented the new "short-nosed" truck, initially in models L 322 and L 327 (medium-weight class) as well as L 337 (heavy class). The short-nosed vehicles were internationally very successful and important for the strategy of what was then Daimler-Benz AG for internationalisation after the Second World War. They continued to be built until the 1990s. In total, almost a million short-nosed vehicles were built – either as complete trucks or as parts kits for construction abroad.
